

G DATA and Microsoft Azure Platform Deliver Flexible, Easy Managed Security Solutions for Both Home Users and Businesses of Any Size

MICROSOFT AZURE APP BUILDER PROFILE: G DATA SOFTWARE AG

For over 30 years G DATA has developed award-winning security solutions for home users and businesses. Win over your customers with cutting-edge security and enjoy the benefits of a well-developed and intuitive piece of software that will leverage your administrative overhead and reduce costs.

WHAT WE OFFER

SIMPLE & EASY DEPLOYMENT

Set up a Management Server for each of your customers using the clearly structured user interface and protect Windows, Mac and Linux clients from viruses and other digital threats.

SCALABILITY

Thanks to Microsoft's highly flexible Azure infrastructure you can instantly react to new workload demands, even if your customers' networks change on a regular basis. You can also manage your G DATA licenses easily and expand them at any time if needed.

MODERN TECHNOLOGY

More than just virus protection, comprehensive Group Policy Management makes sure your company policies are enforced. Keep tabs on more complex networks with an optional monitoring component and monitor anything from printers to servers.

EVERYTHING AT A GLANCE

Keep track of your networks, no matter how many you have to deal with. An intuitive interface will guide you to the function you need then and there. Comprehensive statistics and notifications enable you to react to any situation.

WHAT OUR CUSTOMERS ARE SAYING

"Since the day we installed the product in our network, we have not had a single infection, and I haven't spent any weekends clearing viruses." – Pawel Wolkowicz, Network Manager, buyagift.com

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
